Suzuki RM250 '93-'01
RS six pole stator

INSTRUCTIONS: Wire **RED** wire from RS stator to original **BLACK/RED**

Wire **WHITE** wire to original **WHITE/RED** on stator

The two yellow wires for the RS stator are provided for late model RM's that require a powervalve supply. If your bike does not have these two wires you have two options:

- ❶ Simply cut the wires and insulate them so they cannot short out.
- ❷ Use it for a low wattage light. To do this you must route the two yellow wires through the stator harness.
